COURSE OVERVIEW

Severe chronic lung disease (CLD) of infancy, also known as bronchopulmonary dysplasia (BPD), is the most common chronic complication of premature birth. It affects approximately 25% of preterm infants with birth weights less than 1,500 grams and more than 50% of infants weighing less than 750 grams. Infants with BPD frequently require lengthy hospital stays and costly post-discharge medical care. A diagnosis of BPD is a strong predictor of long-term impairment in lung function, cardiovascular health, growth and neurodevelopment.

Management of infants with severe CLD/BPD presents a unique challenge due to its multisystem involvement and common association with multiple non-lung comorbidities. A coordinated, evidence-based, multidisciplinary approach is crucial to achieve the best outcomes for this high-risk population. Ideally, this strategy includes cohesive management between neonatal and pediatric care providers to facilitate high-level continuity of care during the transition to home and throughout the child's life.

This multidisciplinary course is intended for physicians, advanced practice nurses, physician assistants, nurses, respiratory therapists and other members of the healthcare team such as occupational therapists, physical therapists, speech-language pathologists, pharmacists, dietitians and social workers who provide care for patients with CLD/BPD and their families. This course will explore the pathophysiology, current research and key aspects of the management of severe CLD, including diagnostic and treatment options. This course will also discuss the long-term needs of infants with severe CLD, highlighting the chronic nature of this illness extending beyond the neonatal period.

GENERAL INFORMATION

This conference will be held at the Hilton Philadelphia at Penn's Landing, 201 South Christopher Columbus Blvd., Philadelphia, 19106

Attendees will have access to the PowerPoint slides via **chop.cloud-cme.com**. The in-person conference will be held Tuesday, March 5 and Wednesday, March 6, 2024. Registration will begin at 7 a.m., March 5. The registration fee includes continental breakfast both days, buffet lunch on Tuesday and program materials.

We take health concerns very seriously. COVID-related precautions will be in place to make the in-person event as safe and enjoyable as possible.

All registered meeting attendees and vendors are recommended to be fully vaccinated against COVID-19.

COURSE OBJECTIVES

Upon completion of this course, participants should be able to:

1. Describe opportunities to optimize the transition of care out of the NICU/hospital for infants with BPD/CLD
2. Describe expert approaches to clinical management of medically complex infants
3. Discuss neurosedative use for patients with BPD/CLD
4. Discuss evidence-based strategies in caring for infants with severe BPD/CLD
5. Explore how general movement assessments are different for infant with severe BPD/CLD

CALL FOR ABSTRACTS

Share Your Knowledge and Expertise

The course directors and planning committee invite you to submit an abstract for consideration for the poster session held during the conference. Abstracts related to any aspects of the pathophysiology, prevention or clinical care of Bronchopulmonary Dysplasia or Chronic Lung Disease of Prematurity are welcomed. The top two abstracts will be invited to deliver an oral presentation.

Submission Deadline: Sunday, February 11, 2024 (11:59 p.m. EST)

Accepted abstracts will be published in the conference syllabus. To learn more and submit an abstract, go to **chop.cloud-cme.com** and search Chronic Lung Disease conference.
